```
Demo materials available on community site by end of w/c 16/12
                   Marketing campaigns about demo materials and webinars in full flow ahead of Learning Technologies
                    Development finished by 20/01/2013
                   Solid, well-tested first framework release
Non-functional
                   Web pages restructured to enable success in 5 minutes for developers
                    Essential reading documentation complete and signposted on community site + Github
                    System requirements spec written up and prominent on community site + Github
                   Release roadmap written up and published on community site + Github
                                             DEV-CLI-001: Able to run an installation script for Adapt Framework and CLI
                                            DEV-CLI-002: Able to create a pre-populated example course
                                            DEV-CLI-003: Able to create and instantiate a new course/project
                                            DEV-CLI-004: Able to populate the content (JSON and assets)
                                             DEV-CLI-005: Able to publish (build) the course
                                            DEV-CLI-006: Able to build the course with source-mapping turned on
                                            DEV-CLI-007: Able to invoke minification as part of the build
                                            DEV-CLI-008: Able to invoke unit tests as part of the build
                                             DEV-CLI-009: Able to launch the course offline
                                            DEV-CLI-010: Able to CRUD theme
              Command line interface
                                             DEV-CLI-011: Able to CRUD menu
                                            DEV-CLI-012: Able to CRUD component
                                            DEV-CLI-013: Able to CRUD extension
                                            DEV-CLI-014: Able to configure plug-ins by populating JSON
                                            DEV-CLI-015: Able to register new extensions with the local installation of the Adapt framework
                                             DEV-CLI-016: Able to register new extensions with the Adapt plug-in registry
                                             DEV-CLI-018: Able to install/uninstall a plug-in into a local course/project
                                            DEV-CLI-019: Able to install all core bundle plug-ins in the adapt.json file in one command line
                                            DEV-CLI-020: Able to add plug-ins to the adapt.json file (to simplify the installation process)
                                            DEV-CLI-021: Able to push the newly installed plug-in into the correct folder (e.g. components, themes etc)
                                            Compontent registry re-hosted on Adapt Learning Server
                                              LRN-LF-001: Able to view a course, which looks & feels nice and reflects a brand and design
                                              LRN-LF-002: Able to view a single course on multiple types of devices with different viewports
                                              LRN-LF-003: Able to see imagery as part of the course
                                              LRN-LF-005: Able to see alternative text for content images used in the course
                                              LRN-LF-014: Able to increase the font size of text
                                              LRN-LF-017: Able to view the content in an available font in case a specific font is unavailable
              Basic theme implemented
                                              CCR-LF-003: Able to modify basic theme colour settings
                                              CCR-LF-004: Able to modify high-level padding and spacing settings
                                              CCR-LF-005: Able to set standard font face for the course
                                              CCR-LF-006: Able to set the standard font size for the course
                                              CCR-LF-009: Able to choose background image for the entire course
                                              CCR-LF-011: Able to choose background images for pages
                                              CCR-LF-012: Able to choose background images for articles
                                              CCR-LF-013: Able to insert a transparent placeholder which allows learners to see the background graphic
                                               LRN-NAV-001: Able to view a navigation menu
                                               LRN-NAV-002: Able to navigate to a page
                                               LRN-NAV-004: Able to navigate up a level / to the menu
                                               LRN-PG-001: Able to view a page
                                               LRN-PG-002: Able to view persistent navigation on a page
                                               LRN-PG-005: Able to navigate directly to specific components on a page
                                               LRN-ART-001: Able to view the title and body of an article
                                               LRN-ART-003: Able to navigate an assessment article
                                               LRN-ART-004: Able to be informed of data loss if leaving an assessment article prior to completing the assessment
                                               LRN-BLK-001: Able to view the title and body of a block
              Basic struture / navigation
                                               LRN-COM-001: Able to see the components which contain the content in a meaningful order
                                               LRN-COM-003: Able to view the content associated to a component in a suitable format according to different device
                                               types
                                               CCR-CSTR-001: Able to CRUD a page
                                               CCR-CSTR-002: Able to arrange pages into a hierarchy / sequence
                                               CCR-CSTR-008: Able to CRUD an article
                                               CCR-CSTR-015: Able to CRUD a block
                                               CCR-CSTR-021: Able to CRUD a component
                                               CCR-MEN-004: Able to organise navigation into deep scrolling
Functional
                                               CCR-MEN-005: Able to organise navigation into lateral scrolling
                                           AUTH-DEV-001: Able to upload files to override core code
              Plug-ins and overrides
                                           AUTH-DEV-002: Able to test the effect of overrides in preview
                                           AUTH-DEV-006: Able to pull in and test plug-ins
                                                   LRN-CPR-001: Able to read textual content
                                                   LRN-CPR-002: Able to view a content graphic
                                                   LRN-CPR-003: Able to interact with a graphic by selecting hot areas and revealing associated text and imagery
                                                   LRN-CPR-004: Able to interact with a narrative to reveal a sequence of imagery and text typically used to tell a story
                                                   LRN-CPR-005: Able to interact with an accordion by selecting a sequence of headings, which reveal textual content
                                                   LRN-CQU-001: Able to interact with a multiple-choice question with a single correct option
                                                   LRN-CQU-002: Able to interact with a multiple-choice question with multiple correct options
                                                   LRN-CQU-003: Able to interact with a graphical multiple-choice question
                                                   LRN-CQU-004: Able to interact with a text input question
              ~10 components implemented
                                                   LRN-CQU-005: Able to interact with a matching question by selecting answers from one or more drop-down lists
                                                   LRN-CQU-006: Able to receive correct/partially correct/incorrect feedback for all question types via the tutor feature
                                                   LRN-CQU-007: Able to receive option specific feedback for all question types via the tutor feature
                                                   CCR-WOW-004: Able to immediately preview my changes on multiple devices
                                                   CCR-WOW-008: Able to add textual content with basic formatting
                                                   CCR-WOW-009: Able to add content images to relevant components
                                                   CCR-WOW-010: Able to add alternative text to content images
                                                       CCR-MEN-006: Able to lock navigation to the next block dependent on block completion
              Locking functionality implemented
                                                                 LRN-PG-003: Able to see page level progress
              Progress display functionality implemented
                                                                 CCR-TRK-006: Able to toggle progress display on/off
                                                            LRN-ASSM-001: Able to sit an assessment as part of the course
                                                            LRN-ASSM-002: Able to get question level feedback
                                                            LRN-ASSM-004: Able to receive an outcome of an assessment as part of the session on a result screen
                                                            LRN-ASSM-005: Able to receive feedback dependant on the outcome/score attained
                                                            CCR-ASSM-001: Able to turn an article into an assessment
                                                            CCR-ASSM-003: Able to set the passmark
              Assessment functionality implemented
                                                            CCR-ASSM-004: Able to set which questions count towards the assessment score
                                                            CCR-ASSM-005: Able to determine whether the assessment can be re-taken
                                                            CCR-ASSM-006: Able to determine navigation behaviour during the assessment
                                                            CCR-ASSM-008: Able to provide end of assessment feedback
                                                            CCR-ASSM-009: Able to set graduated feedback (number and range of feedback bands)
                                                            CCR-ASSM-010: Able to use any question component as part of an assessment
                                                            CCR-ASSM-011: Able to step-lock the assessment
                                                            CCR-ASSM-012: Able to inform the learner about potential data loss if they navigate away from an assessment
                                                              CCR-LSUP-001: Able to add/remove file resources
              File resources functionality implemented
                                                      LRN-TRK-001: Able to save progress automatically (if delivered via an LMS)
                                                      LRN-TRK-002: Able to be informed when tracking errors occur and progress tracking is no longer possible
                                                      LRN-TRK-003: Able to leave the course and continue in a subsequent session and find the course in the state in which I
                                                      left it
                                                      LRN-TRK-004: Able to be returned to the last page visited
                                                      CCR-TRK-001: Able to configure what constitutes course completion
              SCORM 1.2 tracking implemented
                                                      CCR-TRK-004: Able to toggle and configure the 'connection lost' message
                                                      CCR-TRK-005: Able to toggle bookmarking (returning users to the location from where they exited the last session)
                                                      CCR-PUB-001: Able to publish a project that produces SCORM 1.2 conformant tracking
                                                      CCR-PUB-004: Able to publish the course in a non-tracking web format
```

CCR-PUB-005: Able to publish content in a compressed / minified format

CCR-PUB-006: Able to publish the course in an uncompressed format

Proposed Adapt Framework MVP (LT release)
